

All New Online Conference: 23 & 24 November 2020

DAY 1 – Monday 23rd November 2020 (All times are South Africa Standard Time i.e. GMT+2)

08h00 – 08h45	Arrival and Networking - We strongly recommend that you plan to arrive well before the first presentation to give yourself time to familiarise yourself with the FLOOR and to plan your conference attendance. Whilst we'd love to offer you coffee and croissants we will have to hope that we can do that soon!
08h45	OPENING AND WELCOME Kea Mpane CSCP, SAPICS President, South Africa
09:00 – 09:45	KEYNOTE PRESENTATION SMART Peacekeeping – Introduction of New Technologies into the Peace Operations Supply Chains As the world's technological revolution proceeds, the United Nations can benefit immensely from a plethora of technologies to assist its peace operations. United Nations peace operations have equally evolved over the past decades. However, the Organisation has adopted a strategy for technology and innovation for peacekeeping. Whether these new technologies are used for the actual program implementation such as peace monitoring through remote surveillance, UAVs, artillery locating radars, and fourth-generation IR devices, or in its supply chains to more accurately forecast demand for fuel, rations, life support commodities, or spare parts for critical equipment by means of SMART technology and IOT in order to optimize responsiveness and agility. While the United Nations remains behind advanced militaries, the Organisation's leadership agrees that "We cannot continue to afford working with 20th century technology in the 21st century". Herbert Pechek is an advocate of 4th industrial revolution technology and makes every effort to explore these innovative features into the supply chains of the United Nations in Somalia. His session will provide an overview of the introduction and integration of new technologies into the peace operations in Somalia. Herbert Pechek, Chief, Supply Chain Management Service, United Nations Support Office in Somalia (UNSOS), Kenya
09h45 – 10h30	KEYNOTE PRESENTATION The Mouse is to The Computer what AI is to The Mind Artificial Intelligence is a tool, not a solution. But it can be an amazing tool working for you, working on your processes. It's not perfect and yes, it makes mistakes. It's also not very creative... It can't invent itself out of anything. It needs human knowledge, and it takes work to get it started. But once it runs, you'll wonder why it wasn't done earlier... It's time to start! Lloyd Keays, Global Senior Director Strategy-Solutions Engineering, SAP, Netherlands

10h30 - 11h15	Networking Break : Make the most of this extended 45 minute break. This time is set aside to provide you with the opportunity to explore the FLOOR, visit the exhibitors in the Premium Booths, see what’s going on in the VIP Lounges or grab a seat at one of the tables in the Lounge and meet up with old friends and colleagues and make new acquaintances.			
11h15 – 12h00	<p>PRESENTATION The Twiga Story – a Story of African Ingenuity</p> <p>Twiga has revolutionised food supply to the informal, independent and small traders in Kenya. The organisation has created a more transparent and efficient supply chain, delivering the product directly to the retailers and reducing post-harvest losses on fresh produce. Join Gary and Peter as they share with you the learnings and challenges of this exciting project.</p> <p>Peter Njonjo, Co-Founder and CEO, Twiga Foods, Kenya</p> <p>Gary Benatar, Founding Partner and CEO, Relog, South Africa</p>	<p>PRESENTATION Unlocking Value from Digitising Logistics</p> <p>There is little doubt that digitalisation will fundamentally change supply chain management. But how do we distinguish between hot air and pragmatic opportunities? How many new inventions are merely fancy new terminology invented to inflate the valuations of technology providers and start-ups? How do we identify where to invest our money and efforts to ensure that we learn as we go and prepare for this new world? Lessons from the real world of logistics and supply chain management.</p> <p>Cobus Rossouw, Group Chief Digital Officer, Imperial, South Africa</p>	<p>PRESENTATION Activating MRO/Spare Parts Management – understanding the basics</p> <p>Does continuous confusion and miscommunication between Supply Chain and Asset Management sound familiar to you? Poor MRO/SPM basics leads to a very fault-sensitive supply chain. It often results in incorrect item requests, RFQs, quotes, issue and returns, etc. but it largely contributes to unnecessary working capital, assets downtime and reliability and quality problems. The answer lies in proper spare parts management basics, not only the configuration of master data but also the development of systems and processes supporting your supply chain. This presentation will present successful spare parts methodologies as a practical solution indicating possible industry pitfalls.</p> <p>Henrico Swanepoel, Business Area Manager, Gordian Logistic Experts, South Africa</p>	<p>PRESENTATION Global Health Maturity Model Assessment Tool v8.0</p> <p>This workshop will focus on the ASCM Global Health Supply Chain (GHSC) Initiative’s cloud-based supply chain Maturity Model (MM), which was designed to help public, private, and NGO professionals dramatically improve performance across country, region, and community healthcare supply chains. This model offers healthcare and supply chain professionals the tools necessary to:</p> <ul style="list-style-type: none"> • Use an easy-to-complete self-assessment to evaluate the maturity, performance, and gaps in specific healthcare supply chains. • Leverage assessment outputs to develop meaningful, low-cost supply chain improvement projects. • Conduct post-assessment activities to sustain continuous improvement (e.g., tracking improvement projects, documenting outcomes, and updating stakeholders). <p>Bolu Awesu, ASCM GHSC Initiative Associate Director for Nigeria and Lerato Thabede, CPIM, Managing Consultant – BBOpEx Solutions</p>
12h00 - 12h15	QUICK BREAK – use this time to find your next session and familiarise yourself with moving around the platform. Remember – if you need HELP please visit the HELP DESK.			

<p>12h15 - 13h00</p>	<p>PANEL DISCUSSION Taking Stock of Developing Your Supply Chain Leaders - The aim of this panel discussion with executives from diverse backgrounds, is to make an overall assessment of our supply chain leadership development process. We will review the importance of investing in this process, also given the turbulent and uncertain times that we live in. We will also evaluate our current efforts to successfully develop our supply chain leaders and what we can do, to be more effective in this important area in business to ensure that we increase our returns on this investment.</p> <p>Moderator Hekkie van der Westhuizen, Director, SALDaTI, Southern Africa</p> <p>Panellists: Ramatu Abdulkadir, Executive Secretary/CEO, Kaduna State Health Supplies Management Agency, Nigeria Buyani Zwane, CEO of Breakthrough Development in collaboration with NOC -No Ordinary Corporation, South Africa Gerrie de Jonge, Managing Director - Africa, Axis Group International, South Africa Glenda Maitin, Managing Director, BBOpEx Solutions, South Africa</p>	<p>PRESENTATION Intelligence - Not so Artificial - is Becoming Essential - Doug starts with a summary of typical business benefits of Artificial Intelligence, fuelled by Machine Learning and data. He uncovers how this technology is being absorbed into Business IT and life now and into the future:</p> <ul style="list-style-type: none"> • First steps into AI/ML – facts/logic to decision making insights • Second phase – BIG data/analysing to decision best options • The probable future – making decisions without human intervention <p>Doug Hunter gives relevant business examples to challenge delegates thinking and help their perfect 2020 vision Doug Hunter, Manager: Professional Services, SYSPRO Africa, South Africa</p>	<p>PRESENTATION Replenishment & Promotion. An instore Solution with the Shopper in Mind - This presentation will look at how instore store solutions have evolved in Europe and where gains have been realized. The speakers will then then consider how to overcome some of the challenges when looking at instore solutions, specifically larger retail ready packs, in the South African supply chain.</p> <p>Conor Powell, Manager - Instore Solutions, CHEP SSA Joao Nogueira, Sales Manager LMS, CHEP Europe</p>
<p>13h00 - 13h30</p>	<p>Networking Lunch Break : Make the most of this half an hour break to visit premium booths and VIP rooms or grab a seat at one of the tables in the Lounge and meet up with old friends and colleagues and new acquaintances. We are sorry we can't provide you with a Century City sumptuous lunch but hope 2021 will let us do so!</p>		
<p>13h30 - 14h15</p>	<p>PRESENTATION Supply Chain as a Driver for Industrialization Focused on SMMEs</p> <p>Logistics in Nigeria is fraught with challenges. The lack of infrastructure is one of the biggest factors hampering supply chain efficiency in Africa's most populous country. A seven-year-old Nigerian logistics business with hubs in Lagos and Abuja is defying the odds, with a recipe for success that combines consolidated loads with seamless customer service and supply chain solutions that address the infrastructure and terrain challenges in Nigeria. Join Zippy Logistics CEO and</p>	<p>PANEL DISCUSSION Unpacking Key Enablers That will Drive Professionalisation, Close the Skills Gap and Raise Supply Chain in Africa</p> <p>The ongoing disruption caused by COVID-19 and new market realities are changing the supply chain landscape and increasing yet further demand for skilled talent. How can professionalisation play a role in enabling these changes and work towards improving the performance of supply chain professionals across the African continent? Join a distinguished panel of supply chain professionals as they unpack the activities of those who are meeting the challenge to professionalise</p>	<p>PRESENTATION An Introduction to Demand Driven Material Requirements Planning (DDMRP)</p> <p>In what is becoming to be known as our 'New Normal' VUCA World, many manufacturing and distribution companies are experiencing problems with the traditional Material Requirements Planning (MRP) systems. Our business environment has changed dramatically since MRP was first introduced to industry. It is time for a supply chain planning change, but to what? Over the last few years many companies have adopted the DDMRP (Demand Driven Materials Requirement Planning) methodology with exceptional</p>

	<p>founder, Kabir Shagaya, as he shares his organisation’s success story, his insights and lessons learnt. Kabir Shagaya, CEO, Zippy Logistics</p>	<p>supply chain management in Africa and around the globe. Moderator: Tonya Lamb, Stakeholder Engagement Relationship Management, SAPICS, South Africa Panelists: Dr Obiora Madu, Director General, African Centre for Supply Chain, Nigeria Sarie Homan, Head of South Africa Professional Body, CIPS Dominique Zwinkels, Executive Manager, People That Deliver, UNICEF John Karani, Chairman, KISM, Kenya</p>	<p>results. Attend the session to learn more. Find out how DDMRP stock buffers provide the answers we have been looking for and how you can, relatively easily, start your demand driven journey, today. Ken Titmuss, Educator, Supply Chain, Operations and Materials Management, South Africa</p>
<p>14h15 - 14h30</p>	<p>QUICK BREAK – use this time to find your next session and familiarise yourself with moving around the platform. Remember – if you need HELP please visit the HELP DESK.</p>		
<p>14h30 - 15h15</p>	<p>PRESENTATION Circularity: The Strategy You’ve Been Waiting For</p> <p>Supply chains are always asked to go faster and be cheaper. How many more options do we really have to go any faster and be any cheaper than we already are? This session introduces the idea of circularity and the circular economy as the next strategy for your supply chain. It explores squeezing more value from the materials and resources already in your supply chain, and the steps you can take to get started. Deborah Dull, Circular Supply Chain Network, USA</p>	<p>PRESENTATION Supply Chain Excellence Using SCOR</p> <p>The Supply Chain Operations Reference Model SCOR is widely recognized as the industry standard used by Supply Chain Professionals at large to create Supply Chain Excellence. A framework that is centred around the four Supply Chain pillars “Process, Practices , Performance and People” that can be utilized to reengineer Supply Chain Processes. With the COVID-19 Outbreak companies more than ever are in need to adopt new practices , measure their Supply Chain, restructure the way they do business to navigate away from the V.U.C.A times .</p> <p>This session sheds light on the various benefits that can be obtained when implementing SCOR model , take the attendees into a journey on the improvement program and the implementation framework. Samer Al Madhoun, Managing Partner, Muhakat Institute, Jordan</p>	<p>PANEL DISCUSSION Increasing Youth Engagement in the Public Health Supply Chain Workforce: New approaches and Lessons learned in Developing Career Pathways</p> <p>In 2011, the world population reached seven billion, with half of its inhabitants being under the age of 30. Young people are today and tomorrow’s entrepreneurs, innovators, workers, and leaders. At the crux of both public and private sectors, the realm of supply chain management requires the cultivation of young talents who can serve as the next generation of health logisticians. Join this session to learn about the inclusion of youth-centered programming across global health supply chains to cultivate the youth workforce of both the present and future. Moderator: Juan Felipe Sanchez Franco, Chief of Party, Honduras-Quality Reading Materials Activity (QRMA), Chemonics International Panelists: Jean-Pierre Sallet, Country Director, USAID GHSC-Technical Assistance Project Francophone TO, Chemonics International</p>

			<p>Herman Bonou, Young Logistician Professional, Abomey-Calavi Health Zone, Benin</p> <p>Rose Anagonou, Project Management Assistant, Office of Health, USAID Benin</p> <p>Ricardo Missihoun, African Logisticians Association Federation (ALAF)</p> <p>Yukabeth Otieno, Project Officer, Pamela Steele Associates, Kenya</p> <p>Dr. Daniel Zapata, Global Program Manager, Kuehne Foundation</p>
15h15 - 15h30	QUICK BREAK – use this time to find your next session and familiarise yourself with moving around the platform. Remember – if you need HELP please visit the HELP DESK.		
15h30 - 16h15	<p>CLOSING KEYNOTE PRESENTATION Creating Sustainable Supply Chains with Blockchain</p> <p>Known as the trust machine, organizations in both the public and private sectors around the world are assessing the use of blockchain to increase transparency and collaboration throughout their business partner networks. As stories of greenwashing continue to emerge within the supply chain space, blockchain could be a potential solution to provide visibility to the life cycle of products. In this discussion, the presentation will begin with the current state of how blockchain is currently used within the supply chain industry to track and trace products. The presentation will conclude with a look into future state use cases to hopefully shift the conventional Cradle to Grave (CTG) mindset of tracking products to a Cradle to Cradle (CTC) mindset to tracking for a more sustainable supply chain network.</p> <p>Professor Justin Goldston, Professor of Project and Supply Chain Management, Penn State University, USA</p>	<p>PRESENTATION Managing the Supply Chain Under Risks of a Disruption: How to Prepare and Execute a Business Continuity Plan</p> <p>How do you proactively prepare for a possible catastrophic event that could disrupt your supply chain? During this session you will hear how important it is to leverage very solid business processes to significantly reduce those risks preventing significant disruptions to occur.</p> <p>Fabio Roncoroni, Director of Supply Chain, Artworks and Labelling in Global Operations, Roche, USA</p>	
End of DAY 1 – Attendees are welcome to stay to network at the Tables until 17:00 (SASTO)			

EXHIBITION

There are a wide variety of exhibitors demonstrating products and services. Spend time with these interesting organisations and make the most of the networking opportunities that the platform provides as it enables you to enjoy face to face meetings. Keep an eye out for the broadcasts with news of competitions with great prizes to be won.

DAY 2 – Tuesday 24th November 2020 - (All times are South Africa Standard Time i.e. GMT+2)

08h00	Arrival and Networking		
08h30 – 09h15	<p>KEYNOTE PRESENTATION Future-Proofing Supply Chains for Risk and Resilience</p> <p>Join John as he recounts the short 50-year history of supply chain development up to the present and introduces the many moving parts in building and embedding resilience in contemporary supply chains, e.g.,</p> <ul style="list-style-type: none"> aligning the internal organisation design (and corresponding subcultures) to underpin the array of supply chain configurations necessary to match the spread of buying behaviours identified in the external market recognition that we are now effectively managing in a parallel universe, i.e. a set of supply chain configurations to manage the business-as-usual (BAU) level of volatility, plus an entirely new supply chain to manage extreme and unexpected disruptions with very high volatility apart from getting the precise architecture right, there is now an urgent and mandatory requirement to digitise supply chains, E2E, and do it fast implementing all the above initiatives, and more, with a prudent approach to risk management <p>Dr John Gattorna, Global SC ‘thought leader’ & Author, Partner, Gattorna Alignment, Australia</p> <p>Transition to Keynote 2 – this will happen automatically. If you do not move automatically please click on the FLOOR icon and then on the session to get back into the session.</p>		
09h15 – 10h00	<p>KEYNOTE PRESENTATION Maintaining a Balance in Your Life – Strategies for Work Life Balance</p> <p>Most employee surveys reveal that people are continually feeling overworked and overloaded, and that they do not have the right balance between their lives and their work. They crave for flexibility in the work system that allows them to meet the other needs of their lives. They crave for simplification of work processes in the workplace that allows them to be more productive at work, and still have energy to do the things that they love to do. Work–life balance is having enough time for work and enough to have a life thus the work life balance. Join award winning speaker, Temitope Ogunfayo for this captivating presentation which will expose all participants to profound, but very simple, well tested and proven strategies to maintain a healthy Work Life Balance. Supply Chain practitioners will, of course, be able to improve their productivity when they enjoy a better work life balance. Then and only then, will they be able to unleash their full potentials.</p> <p>Temitope Ogunfayo, Associate Director, Supply Network Operations, Babycare (IMEA) at Procter & Gamble, Switzerland</p>		
10h00 – 10h15	QUICK BREAK – use this time to find your next session and familiarise yourself with moving around the platform. Remember – if you need HELP please visit the HELP DESK.		
10h15 – 11h00	<p>PRESENTATION Modern Day Slavery</p> <p>Shocking as it may be modern slavery still exists in this day and age and it exists in modern global supply chains. It might often be well hidden but the problem is REAL. The recent economic and social impact of COVID-19 is exposing supply chains to more risks of modern slavery occurring and is closer to your business than you think. Join Rachel Wu as she discusses practical ways in which we can tackle this growing scourge as we take into account the variations in local regulations, culture and awareness which all add to the complexity in tackling modern slavery in supply chains.</p> <p>Rachel Wu, Managing Director: Asia, Axis Group International</p>	<p>PRESENTATION Making an Impact: Key Insights from ASCM’s Global Health Supply Chain Initiative in Africa – Year 2</p> <p>The ASCM Global Health Supply Chain Initiative has been the recipient a number grants (The Global Fund, Bill & Melinda Gates Foundation, PEPFAR), with a mission to help support Ministries of Health in solving critical public health supply chain challenges, including weak distribution systems, a lack of reliable monitoring and data collection mechanisms and overall supply chain talent capacity. Join this session to learn more about our efforts in the region to date in leveraging proven best practices to grow an effective, sustainable supply chain in these frontier markets, as well as future initiatives to</p>	<p>PRESENTATION Green Lights on Sustainable Supply Chains</p> <p>The responsibility to look after our environment has advanced from big corporates and government, to smaller contributors and the consumer. With logistics being one of that largest negative environmental contributors, it is key there is an underlying plan to improve and progress individual businesses and the sector as a whole. In order for a green supply chain to work, it needs to be cost effective, and sustainable. In this session, we will look at Supply Chain links (from supplier, to store, to return logistics) that have an impact on the environment, whether directly or indirectly, and innovative solutions and plans that are currently being</p>

		<p>elevate the maturity of supply chain communities across the region.</p> <p>Judith Kariuki, Associate Country Director, ASCM Global Health Supply Chain, Kenya</p> <p>Clement Ngombo, Associate Director-Senegal, Global Health Supply Chain Initiative, Association for Supply Chain Management (ASCM), Senegal</p>	<p>implemented.</p> <p>Anton Coetzee, Senior Engineer, Relog, South Africa</p>
11h00 – 11h15	QUICK BREAK – use this time to find your next session and familiarise yourself with moving around the platform. Remember – if you need HELP please visit the HELP DESK.		
11h15 – 12h00	<p>PANEL DISCUSSION Rethinking Your Supply Chain</p> <p>The events of 2020 have accelerated the interest in cloud-based solutions and in parallel, companies all over the world are re-evaluating or ‘Rethinking’ their supply chain operations to be better prepared for any future disruption. During this panel discussion, our experts will discuss why companies will need to rethink the ways they integrate to people, systems, and things across the internal and external digital ecosystems. The panel will look at why companies need to introduce more flexibility into their business operations and embrace a more adaptive supply chain operation.</p> <p>Moderator: Kim Winter, Founder & Global CEO, Logistics Executive Group, Dubai</p> <p>Panelists: Mark Morley, Director of Product Marketing, Open Text, UK Justin Goldston, Coordinator of project and Supply Chain Management, Penn State University, USA Thomas Goldsby, Haslam Chair of Logistics, University of Tennessee, USA MJ Schoemaker CSCP, CPF, SAPICS Director and Director of ProscE2E, South Africa</p>	<p>PRESENTATION Automating Replenishment Planning of Medicine in the South African Public Health Supply Chain</p> <p>Stocking out of medicine could be life threatening, therefore appropriate levels of medicine availability are necessary to meet patient needs. Current processes require the already overburdened health care practitioners to manage the medicine storeroom, count the stock levels, calculate the replenishment orders and issue stock to the consulting rooms when required. Many of these process steps fail, resulting in stock shortages. This presentation will provide insight to the approach of designing the new, analytically based, replenishment planning process. It will also cover the tools used to create a recommended order, in an effort to automate the stock replenishment process.</p> <p>David Crewe-Brown, Managing Consultant, Guide House, South Africa</p>	<p>PRESENTATION Strategic and tactical tools to embed resilience</p> <p>This presentation focuses on tools and frameworks that can help us navigate the next ten years. Two fundamental dynamics will define the period for supply chain leaders. The first is uncertainty. Even when Covid recedes, we are still expecting to face a more volatile operating environment and stressed economies. The focus will be on adaption and resilience. And the second dynamic is the shift in expectations regarding environmental impact. Supply chains are front and centre, and investors particularly, are expecting change. The imperative then is for supply chains that are more resilient, can quickly adapt as demand and supply fluctuate, and that can chart a course, or prove their credentials, in terms of minimising impact. The presentation will cover:</p> <ul style="list-style-type: none"> · Views on the supply chain priorities for the next ten years · Strategic tools to plan for volatility and shifting objectives, and · Faster decision-making tools and tactical responses to disruptions. <p>Deborah Ellis, Partner, Gattorna, Australia</p>
12h00 – 12h30	QUICK BREAK – use this time to find your next session and familiarise yourself with moving around the platform. Remember – if you need HELP please visit the HELP DESK.		

<p>12h30 – 13h15</p>	<p>PRESENTATION Applying the Kaizen Change Model for Continuous Improvement in Supply Chain Management</p> <p>The Kaizen Institute is working with partners in 15 African countries to strengthen health supply chains. Across countries and various levels of facilities, commonly identified problems include lack of performance metrics and poor communication within and across functions. In turn, these lead to poor performance for several key areas including warehouse or pharmacy organization, order lead time, stock outs, expired stock, etc.</p> <p>Delegates will be guided by expert Kaizen Institute facilitators through case study examples from Kenya, Nigeria and Ethiopia—to identify key areas for improvement and their root causes. Next, participants will use insights gathered from problem identification to learn how to apply key approaches under the Kaizen Change Model to build a sustainable culture of Continuous Improvement that in turn results in improved supply chain performance.</p> <p>Piyush Sood, Consultant, Kaizen Institute, Kenya Vincent Nguimbi, Senior Consultant, Kaizen Institute, Kenya</p>	<p>PANEL DISCUSSION Mapping the Vision Into 2022: Walking the Talk on Diversity in Supply Chain</p> <p>Time to break the glass ceiling.</p> <p>How do we walk the talk on diversity in procurement and supply chain? Taking a deeper look into who the industry has to look up to, what we can do to make the change and where do we think we will be in the near future?</p> <p>Moderator: MJ Schoemaker, CSCP CPF, Owner/Director, ProscE2E, South Africa</p> <p>Panelists: Azuka Okeke, Regional Director, Africa Resource Centre (ARC), Nigeria Grant Swanepoel, Senior Advisor, CHAINovation, South Africa Glenda Maitin, Managing Director, BBOpEx Solutions, South Africa Sheri Hinish, Founder & CEO, Supply Chain Revolution, USA</p>	<p>CO-PRESENTATION : Enabling E2E Supply Chain Visibility and Execution Planning & Optimisation</p> <p>Supply Chains are moving from lean-oriented, cost-optimised processes towards high customer and consumer-centric processes. Digitisation, including the use of advanced AI/ML techniques, are key to creating autonomously operating supply chains to support these new customer satisfaction objectives. Join these industry leaders for an enlightening presentation which will highlight solutions that enable retailers, manufacturers and 3PLs to transform their current IT landscape ensuring rapid business growth with digitalisation as a foundation.</p> <p>Himanshu Mehrotra, Director, Industry Strategy, Blue Yonder Peter van Merode, Vice-President Logistics Industry Strategy, Blue Yonder</p>
<p>13h15 – 13h30</p>	<p>QUICK BREAK – use this time to find your next session and familiarise yourself with moving around the platform. Remember – if you need HELP please visit the HELP DESK.</p>		

13h30 – 14h15	<p>PANEL DISCUSSION Circular Economy: Is it the Solution for a Sustainable Future?</p> <p>Supply chains around the world are disrupted by many factors. Taking a sustainable approach can future-proof our supply chains so that disruptions impact us less than they do today; and the financial argument for sustainability is made even stronger using a circular lens. This panel will explore using the circular economy as an anchor for creating a future-proofed, sustainable supply chain.</p> <p>Moderator: Deborah Dull, Circular Supply Chain Network, USA</p> <p>Panelists: Anton Coetzee, Senior Engineer, Relog, South Africa Sheri Hinish, Founder & CEO, Supply Chain Revolution, USA Mucai Kunyihia, National Chairman, Kenya Association of Manufacturers, Kenya Iñigo Canalejo Lasarte, Sustainability & Government Affairs Director, Europe & IMETA, Brambles</p>	<p>PRESENTATION Adapt or Die – Surviving, Adapting and Thriving in the VUCA World</p> <p>Companies are failing at an unprecedented rate. The rise of volatility, uncertainty, complexity and ambiguity (VUCA) in today’s operational environment is creating enormous stress on conventional business rules, tools and processes tracing their roots back to the late 1950s. Carol Ptak, co-founder of the Demand Driven Institute, will share an emerging management model that allows companies to better align assets and capabilities to market opportunities while driving both innovation and adaptation with the changing landscape.</p> <p><i>Carol Ptak, Demand Driven Thought Leader, Demand Driven Institute, USA</i></p> <p>ASK CAROL - Carol Ptak will be at the Demand Driven Africa Booth immediately after this presentation to answer any of your questions.</p>	<p>PRESENTATION Ethical Leadership - The Path to Attaining Inclusive and Sustainable Growth for the African Continent 2020 and Beyond</p> <p>“All things stand and fall on leadership – ethical leadership!” African Union’s Agenda 2063 is becoming more elusive. Not for lack of competent leaders. But for dearth of moral leadership. Organisations, large and small, desire consistency and sustainability. This session aims to:</p> <ol style="list-style-type: none"> 1. Challenge status quo – Beyond the rise of corruption, grappling with 4IR, legislated transformation, 2. Equip – with insights from Best & Poor Practices in industry, and 3. Shine a light on sustainable Ethical Leadership. <p>Buyani Zwane, CEO, NOC- No Ordinary Corporation in partnership with Breakthrough Development, South Africa</p>	
14h15 – 14h30	QUICK BREAK – use this time to find your next session and familiarise yourself with moving around the platform. Remember – if you need HELP please visit the HELP DESK.			
14h30 – 15h15	<p>PANEL DISCUSSION Private Sector Engagement in Health Systems Strengthening: Opportunities and Best Practices in Africa</p> <p>As governments in Africa continue to navigate and engage with the private sector in their health supply systems strengthening, it is important to understand how this engagement can be done at a practical level. This webinar focuses on the engagement stories and how the public and private sectors are currently working together to improve health outcomes for all.</p> <p>Moderators: Bronwyn Timm, Strategy & Partnerships Lead, Africa Resource Centre</p>	<p>PRESENTATION Cross-dock Operations - The Ultimate Warehouse with No Stock</p> <p>This presentation examines Cross-docking verses conventional warehousing and includes 3 South African case studies where operations have been optimised by changing the philosophy to get to zero stock. “Pick to zero” and “flow through” are compared to traditional cross-dock operations, along with the technical complications of integrating suppliers and customers into a zerostock environment. Risks associated with a zero-inventory environment are examined, along with the necessary changes to supplier conformance and overall operational culture.</p>	<p>PRESENTATION Supply Chains of the Future</p> <p>The SAPICS Annual Conference would not be complete without an update on the activities at the Association for Supply Chain Management (ASCM) on experiences, plans and future vision. SAPICS is the only Premier Elite Partner in Africa and is proud to</p>	<p>VIP ROOM MEETING The Demand Driven Adaptive Enterprise</p> <p>Join Carol in an informal session in the Demand Driven VIP Lounge where she will answer your questions regarding Demand Driven Material Requirements Planning and anything else concerning a Demand Driven Enterprise. Carol is a leading authority in the</p>

	<p>Bonface Fundafunda, Director, East Africa, Africa Resource Centre Panellists: Dan Keim, Director, Humanitarian Logistics, The UPS Foundation Israel Bimpe, Partnership Lead, Zipline Lauren Marks, Director, Private Sector Engagement for PEPFAR, US Department of State, Office of the Global AIDS Coordinator Dr. Paul Okware, Chief Operations Officer, NMS, Uganda Matthew Barnes, Senior Advisor for Strategy, PEPFAR, US Department of State, USA</p>	<p>Aldi Steenkamp, Consultant, Industrial Logistic Systems (ILS)</p>	<p>represent ASCM in this role. Abe Eshkenazi CSCP, CPA, CAE, CEO, Association for Supply Chain Management (ASCM), USA</p>	<p>use of ERP and Supply Chain tools to drive improved bottom line performance Carol Ptak, Demand Driven Thought Leader, Demand Driven Institute, USA and Ken Titmuss, Demand Driven Africa, South Africa</p>
<p>15h15 – 15h30</p>	<p>QUICK BREAK – use this time to find your next session and familiarise yourself with moving around the platform. Remember – if you need HELP please visit the HELP DESK.</p>			
<p>15h30 – 16h15</p>	<p>PRESENTATION Utilising Supply Chain Simulators to Increase Performance and Productivity in the Workplace The aim of the session is to explain the benefits of utilizing workplace simulators in the Supply Chain Environment. The focus of this session is to present empirical evidence, using a qualitative approach with case studies to share data, statistics and success stories of the impact and benefits simulators have for existing employees up-skilling as well as new job entrants. The Supply Chain Simulator is linked to critical skills required in the workplace as well as focused job functions and activities. In the session key information is shared and explored to history, skills, impacting theories, benefits, challenges and opportunities. Juliette Fourie, CEO, Metro Minds, South Africa</p>	<p>CO-PRESENTATION The Clinical Drug Supply Chain - SCOR Transformation Journey This session will showcase the journey that the Roche Pharmaceuticals Clinical Drug Supply Chain team went on using the SCOR-based “Racetrack” to identify, assess and optimize performance across the business, over a two-year period. Also, at this session, special guest from Roche, Nathalie Mathys, who is based in Basel, Switzerland will provide a first-hand view the journey that the organization went on. Grant Swanepoel, Senior Advisor, CHAINovation, South Africa Douglas Kent, Managing Partner, CHAINovation, USA Nathalie Mathys, Roche, Switzerland</p>	<p>CO-PRESENTATION Mapping A Career Pathway for Health Supply Chain Professionals Many low- to middle-income countries lack a professionalized supply chain occupational category. This professionalization is critical to embedding a workforce with specific supply chain competencies in the health system. Without trained professionals to manage health supply chains, drugs and supplies do not reach the patients who need them. The People that Deliver (PtD) Supply Chain Management (SCM) Professionalization Framework is a systematic approach to workforce development, where all practitioners are able to find a career path for growth and development, allowing supply chain professionals to lead and operationalize public healthcare supply chains and achieve country and organizational objectives. Dominique Zwinkels, Executive Manager, People That Deliver, UNICEF, Andrew dos Santos, Director, CLX, South Africa, Alexis Strader, Project Officer, People That Deliver, UNICEF</p>	

16h15 – 16h45	Enjoy a final chat and then make your way to the Brain of the ASCAnation QUIZ. This exciting and fun end to SAPICS 2020 will begin promptly at 16:45 and will be via ZOOM
16h45 – 17h45	<p>This is a quiz with a difference! Join Scott Luton, Greg White and team members from Supply Chain Now for a dynamic and engaging quiz. We will start the session getting to know Greg and Scott and gaining their insights into the world of supply chain management in 2020. Having interviewed hundreds of supply chain professionals in this turbulent year they have some great insights to share. The quiz will be made of 20 general knowledge questions covering a broad spectrum of supply chain management and also some challenging general knowledge questions on Africa. Join us and if you really do know your “stuff” you might win one of the amazing prizes on offer!</p> <p> Supply Chain Now is the voice of supply chain and a globally-recognized, multi-platform digital media publisher with millions of content plays since 2017.</p> <p>This event is organised in collaboration with Smart Procurement World as part of the Brain of the ASCAnation series.</p> <p>As with previous sessions the Quiz will take place on ZOOM and we will use KAHOOT. You will need to have a laptop/computer and a phone for this session in order to participate fully.</p> <p><u>You will be sent a separate link to join this session</u></p>
17h45	SAPICS 2020 CLOSES

EXHIBITION

There are a wide variety of exhibitors demonstrating products and services. Spend time with these interesting organisations and make the most of the networking opportunities that the platform provides as it enables you to enjoy face to face meetings.
